

DTX1

Supplement Facts

Serving Size: 1 Bottle

Servings per container: 1

Amount Per Serving	% Daily Value	
Ascorbic Acid, Vitamin C	15g	25,000%
Proprietary Detox Blend:	34g	
Magnesium Sulfate Heptahydrate (USP grade)		
Katuka (Picrorhiza kurroa) (Roots and Rhizomes)		
Yucca Powder		
ZoiVi Multi-enzyme complex		
(Amylases, lipase, proteases and lactase)		
Bhumyaamlaki (Phyllanthus amarus) (whole plant)		
Indian Gooseberry (Emblica officinalis) (fresh fruit)		
Triphala Extract		
Ayurvedic Amla, Bahera, Harada digestive aid		
(Emblica officinalis, Terminalia belerica,		
Terminalia chebula) (seedless plant fruits)		

*Daily Value not established

DTX2

Supplement Facts

Serving Size: 1 Bottle

Servings per container: 1

Amount Per Serving	% Daily Value	
Natural Vitamin E (Soy-derived)		
(as d-Alpha Tocopherol)	30 IU	100%
Organic Safflower Oil	3 oz	*
(cold-pressed from organic		
safflower seeds)		

*Daily Value not established

NO

Yeast, Wheat, Sugar, Salt, Dairy,
Fish, Animal Derivatives, Preservatives,
Artificial Colors or Flavors Added.

GMO-Free

Kosher - Halal - Certified Ingredients

Consult your physician prior to use if pregnant or nursing.

Preparation: The day of detox your breakfast and lunch should consist of a light meal with no fat or dairy. Do not consume food or drink after 2 PM. You may sip water when thirsty. This allows bile to buildup and helps to eliminate toxins, stones, and buildup from your liver.

DAY 1

DTX1 Directions: Mix contents of DTX1 into 24 oz. (710 ml) of organic apple juice. Shake well and store in fridge. Drink 6 oz. (177 ml) of DTX1 at 6 pm. Drink another 6 oz. (177 ml) of DTX1 at 8 pm.

DTX2 Directions: Squeeze a chilled fresh grapefruit or lemon into the DTX2 bottle. Close lid and shake VERY well. Using a straw, drink the entire contents immediately.

Please note: Drink your DTX2 immediately after you prepare it, just before you go to sleep. For maximum effect, lay on your right side for 20 minutes after drinking the DTX2.

DAY 2

Upon waking the next day, drink 6 oz. (177 ml) of DTX1 and the final 6 oz. (177 ml) of the DTX1 mixture two hours later.

Note: You may experience nausea, light headache, or stuffiness. This is normal as your body moves toxins through your system and out of your body. Once you start having bowel movements, start drinking water. You may eat a meal 5 hours after your last 6 oz of DTX1.

Simple. Natural. Effective.

dtxTM

A Natural Premium Life Product

We all eat food everyday. It is a necessity.

DTX1 and DTX2

We all eat food every day, but the problem is we don't really know what we are putting in our body! This is where problems begin to develop. Most of the food we consume have been treated with pesticides, hormones, chemicals, and are genetically modified. This causes a buildup of toxins as we age. Aside from being easily fatigued and tired, the body does not show any of the damage this causes until the later years. Our system is not designed to handle this toxic buildup, and the body begins to slow down struggling to maintain normal functions. This is the source of the imbalance in the body.

This toxic buildup results in many health issues over time, yet it's not until we approach the 30's, 40's and 50's that most health issues begin to show. Today more than ever a detox has become an important part of maintaining a clean and balanced system. In order to eliminate the buildup we begin with the DTX, a full body detoxification and cleansing system to bring the body back in to balance, allowing it to function at peak levels.

The DTX1 starts at the source of the build up (the liver) and prepares to cleanse the body from the inside out using a unique combination of minerals, salts, and super anti-oxidant berries. The DTX2 is a unique blend of organic safflower oil and natural organic Vitamin E.

The DTX2 initiates the detox effect, naturally and the organic blend makes sure you get maximum results!

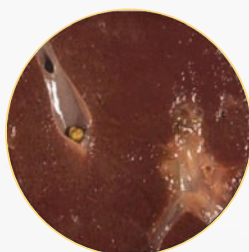

The DTX is not a weight loss system, however, the cleansing process can eliminate build-up in the belly area (otherwise known as the "pooch") and can start the process to having a much healthier system. This is the foundation to better health, and a natural way of restoring your body.

Begin at the source

The ZoiVi DTX is designed to help eliminate the toxins that have accumulated from foods over time. The process begins with the liver, and completes throughout the rest of the body.

Toxic Liver

Healthy Liver

Healing power of nature blended with science

Guaranteed Results

We can guarantee results for anyone within 2 days of using the DTX. Clinical tests show the eliminated waste is composed of Fluoride, Sulfide, Sulfate, Mercury, and Nitrate. The average person eliminates about 2-5 pounds within their first 24-48 hours of using the DTX, through water weight, toxin elimination, and increased metabolism. The next step is to optimize health through proper supplementation and nourishment.

Magnesium Sulfate Heptahydrate

Eases the liver and gallbladder cleanse by triggering gallbladder contraction and relaxing the muscles controlling the release of bile into the intestine. Supports detoxification and removal of small stones. Ascorbic acid has multiple health benefits, such as immune system support, anti-aging, mineral absorption and allergies.

Phyllanthusamarus (whole plant)

Phyllanthusamarus has been used in Ayurvedic medicine for over 200 years for asthma, bronchial and genitourinary infections, bacterial infection of the GI tract, and eye ailments. In addition, the plant is successfully used for liver protection / detoxifier and a traditional medicine for jaundice and viral hepatitis B.

Triphala

It is considered a cornerstone of Ayurvedic medicine. Tripala consists of equal amounts of three medicinal herbs: Emblica officinalis (Amla), Terminalia chebula and Terminalia bellerica. Triphala boosts the body detox by stimulating bile-flow and has special benefits of each plant in terms of liver protection against free radicals, hepatitis viruses, and liver damaging chemicals.

Amla

This ingredient is one of most powerful natural antioxidants and additionally, it has been used as a digestive aid, hepato protector and anti-diabetic. Studies conducted by Rafatullah (2002), Suryanaraya et al (2004), Rao et al (2005) and Yokozawa (2007) demonstrated amla's healing efficacy in cases of stomach ulcer and carcinogen induced liver ailments. In addition, amla reduces hepatic fibrosis, which is a major prelude of chronic liver disorders including chronic inflammation, cirrhosis and hepato cellular carcinoma.

Terminalia bellerica (Bahera)

In Ayurvedic, Terminalia bellerica (TB) is used for digestive, urinary, and respiratory tract ailments. It is also a well known natural rejuvenator. Studies discovered TB lowers lipid levels in the body, particularly in the heart and liver. In other words, TB is beneficial in preventing fatty liver and heart disorders.

Terminalia chebula(Harada)

The hepato protective effect of Terminalia chebula (TC) extract can be mediated by its antioxidant and membrane stabilizing activities. In the case of liver toxicity, which can be triggered by antibiotics for tuberculosis treatment, TC extract is shown to prevent biochemical and histological alterations.

How it works (Overview of Mechanism of Action)

The liver is responsible for filtration of all incoming foods and fluids. The body relies upon the liver to remove toxins so that nutrients supplied to the body are pure and capable of providing nourishment. After distributing the nutrition throughout your body, and eliminating the waste, any elements the liver cannot handle stays in the body, such as chemicals, pesticides, and hormones. This is why sometimes if vegetables are not washed correctly some people experience allergic reactions such as an itchy throat or rashes.

Over time, these chemicals can become carcinogenic (cancer-causing), or disease causing. A detox is necessary to cleanse the body of these elements.

The DTX system is designed to initiate a full body detox, facilitating digestion through the breakdown of macronutrients, which results in better absorption and retention of nutritional constituents in the body. Poor digestion, for instance poor protein digestion produces harmful substances that burden the detoxification capacity of the liver. These substances cause other problems including impaired absorption, unfavorable pH change, intestinal microbial overgrowth, putrefaction and hormone imbalance. These indigested constituents lead to chronic degenerative disorders, such as gastrointestinal disease and cancer.

Test results on the bile stones passed by people on our product were completed by a laboratory that performs soil analysis via F.D.A. standards and guidelines. The findings were as follows:

100% of the stones contained So₄, a by-product of fossil fuel and biomass combustion. This is very acidic and may potentially lead to major pH changes in the body.

100% of the stones contained sulfide, a component of "mustard gas", solvents, dyes, and industrial chemicals.

70% of stones contained both fluoride (found in water, soil) and nitrate (used to preserve color and cured meats such as bacon and hot dogs).

40% of stones contained mercury, a known neurotoxin to the human body!

These chemicals are found in the water we drink, foods we eat, and air we breathe. It is not an accident that we are toxic. If someone is not detoxing, they are accumulating these toxins without knowing it. And by the time it shows, the damage has been done. After a DTX, many notice an improvement in energy, digestion, skin clarity, appetite and even their physique.

The 24 hour DTX process is simple, effective, safe, gentle and is GUARANTEED!

We use only the highest quality and purest form of every ingredient manufactured in FDA inspected facilities to maximize your results. For optimal benefit, combine with other ZoiVi products.
